Canvas P18 — Full-Bleed Fix: Screens Fill Width, Widgets Look Right

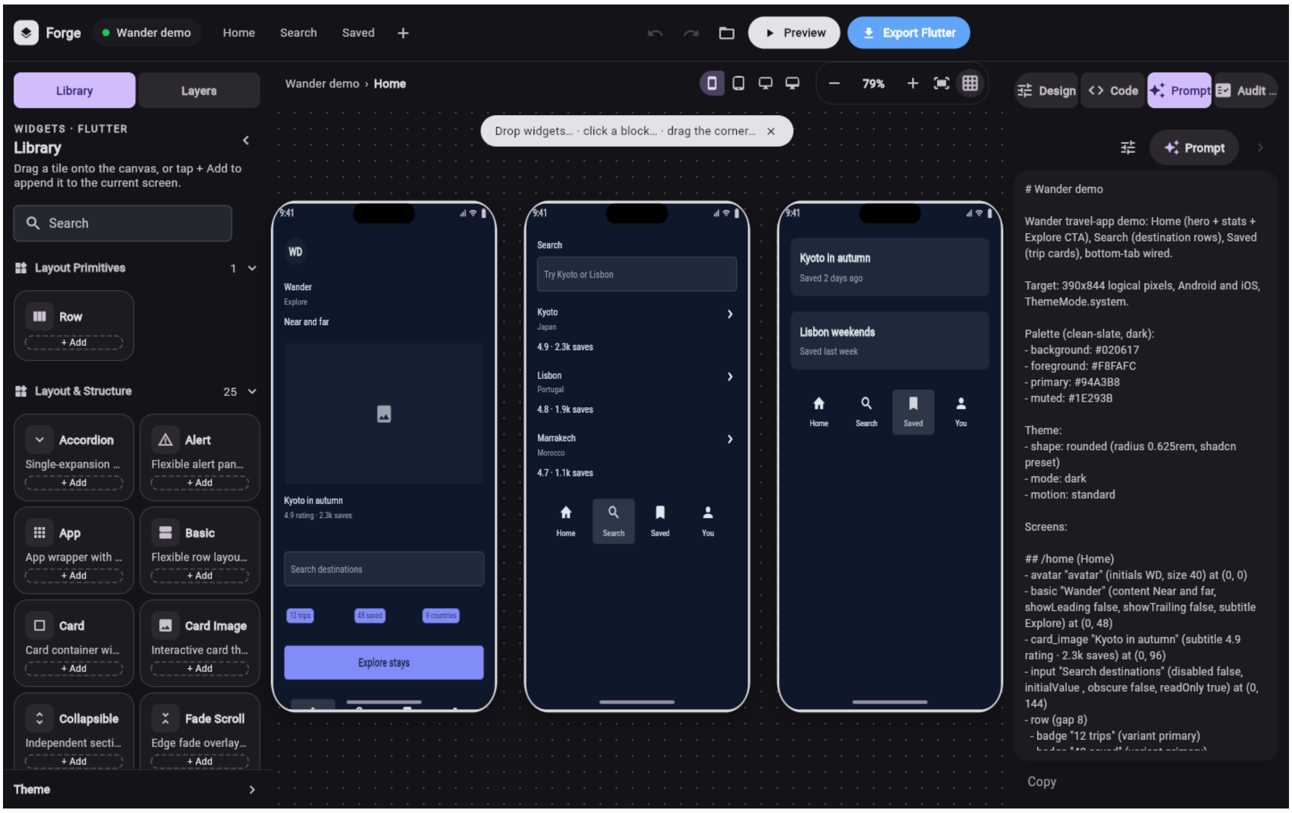
Branch feat/canvas-p3 · Flutter 3.47.2 · Release bundle, 1440×900 · Wander demo (3 screens, 18 nodes, 4-action cycle) · Zero page errors

Track	What landed	Tests
Z1 — stretch	Flow/columns stretch; fixed-w preserved left-aligned; preview parity; row shares preserved	+6 full-bleed
Z2 — beauty	Card type/gaps, 16:9 art, 48px inputs/buttons, nav equal shares, badge air, goldens updated w/ cause	+9 beauty
Follow-up	INTRINSIC EXEMPTION: avatar/badge/chip/spinners/stars keep natural size left-aligned (screenshot-proven)	row_flex + X1 pins updated

Repo health: analyze clean both packages; app 930 pass, core 290 pass. Root causes: (1) flow Column start-aligned → stretch everywhere, fixed-w via left-aligned wrapper; (2) blind stretch ballooned fixed-geometry widgets → 7-kind intrinsic set exempted in editor + preview. Row equal-share flex untouched.

1 · Dark — full-bleed cards, 40px avatar, spread nav

Hero card, search field, stat pills, full-width CTA; bottom nav spread across the frame; avatar a proper circle.



Wander demo

Wander travel-app demo: Home (hero + stats + Explore CTA), Search (destination rows), Saved (trip cards), bottom-tab wired.

Target: 390x844 logical pixels, Android and iOS, ThemeMode.system.

Palette (clean-slate, dark):
- background: #020617
- foreground: #F8FAFC
- primary: #94A3B8
- muted: #1E293B

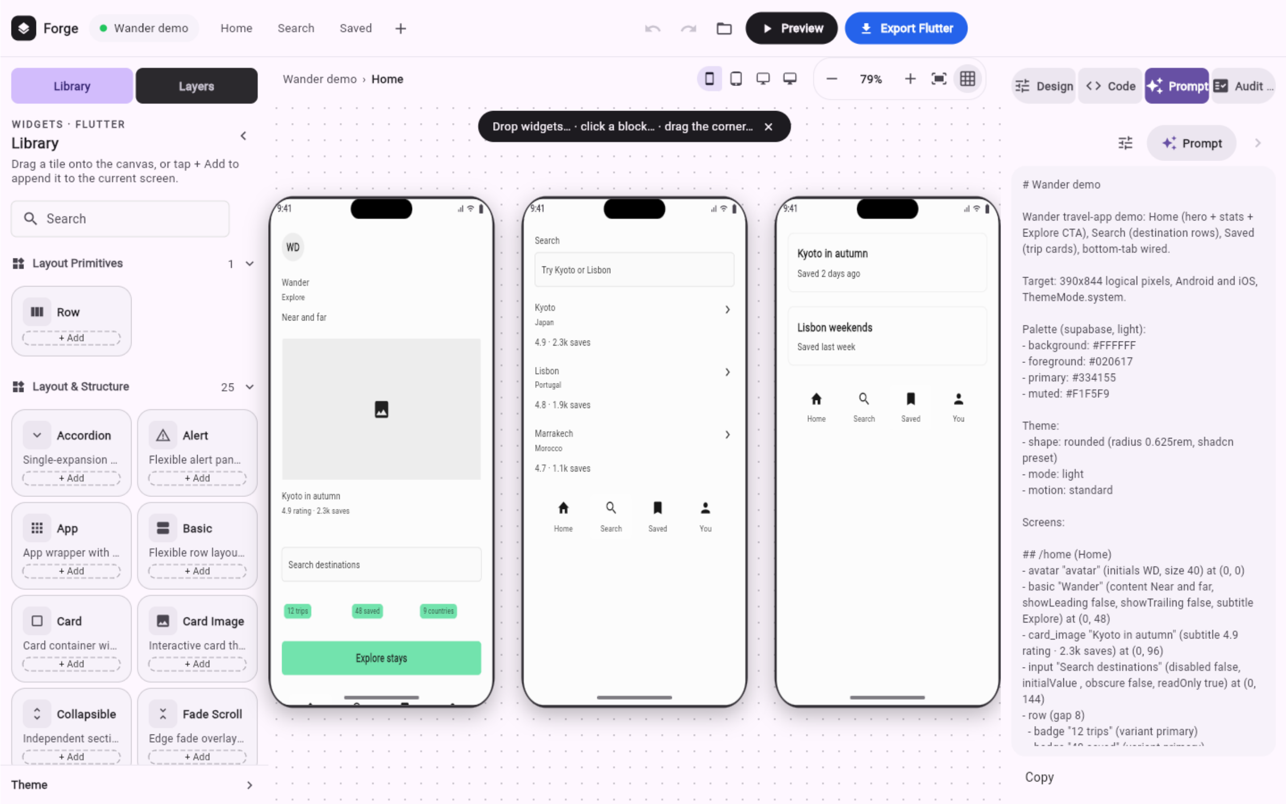
Theme:
- shape: rounded (radius 0.625rem, shadcn preset)
- mode: dark
- motion: standard

Screens:

/home (Home)
- avatar "avatar" (initials WD, size 40) at (0, 0)
- basic "Wander" (content Near and far, showLeading false, showTrailing false, subtitle Explore) at (0, 48)
- card_image "Kyoto in autumn" (subtitle 4.9 rating · 2.3k saves) at (0, 96)
- input "Search destinations" (disabled false, initialValue , obscure false, readOnly true) at (0, 144)
- row (gap 8)
  - badge "12 trips" (variant primary)

2 · Light Forge chrome — the reference look

White cards, dotted canvas, blue Export pill, Dynamic Island phones, 16:9 hero art, green CTA under supabase. No stray colors, no page errors.



Drag a tile onto the canvas, or tap + Add to append it to the current screen.

```
# Wander demo

Wander travel-app demo: Home (hero + stats + Explore CTA), Search (destination rows), Saved (trip cards), bottom-tab wired.

Target: 390x844 logical pixels, Android and iOS, ThemeMode.system.

Palette (supabase, light):
- background: #FFFFFF
- foreground: #020617
- primary: #334155
- muted: #F1F5F9

Theme:
- shape: rounded (radius 0.625rem, shadcn preset)
- mode: light
- motion: standard

Screens:

## /home (Home)
- avatar "avatar" (initials WD, size 40) at (0, 0)
- basic "Wander" (content Near and far, showLeading false, showTrailing false, subtitle Explore) at (0, 48)
- card_image "Kyoto in autumn" (subtitle 4.9 rating · 2.3k saves) at (0, 96)
- input "Search destinations" (disabled false, initialValue , obscure false, readOnly true) at (0, 144)
- row (gap 8)
  - badge "12 trips" (variant primary)
```

Drag-to-full + presets (for your testing)

Select any node → drag right/bottom/corner handles to any size up to the full inner width (390 phone / 768 tablet); live WxH chip while dragging; one undo per gesture. Inspector Size card: Fill (full), Half, Third presets + Auto reset. Fixed sizes apply on all visible tiers; hiddenOn still drives responsiveness. Hard-refresh the :8900 tab (Cmd+Shift+R) to pick up the new build.
