Canvas P9 — Wave 4 (S/T/U): Regen Proof, Narrow Fixes, Field Preservation

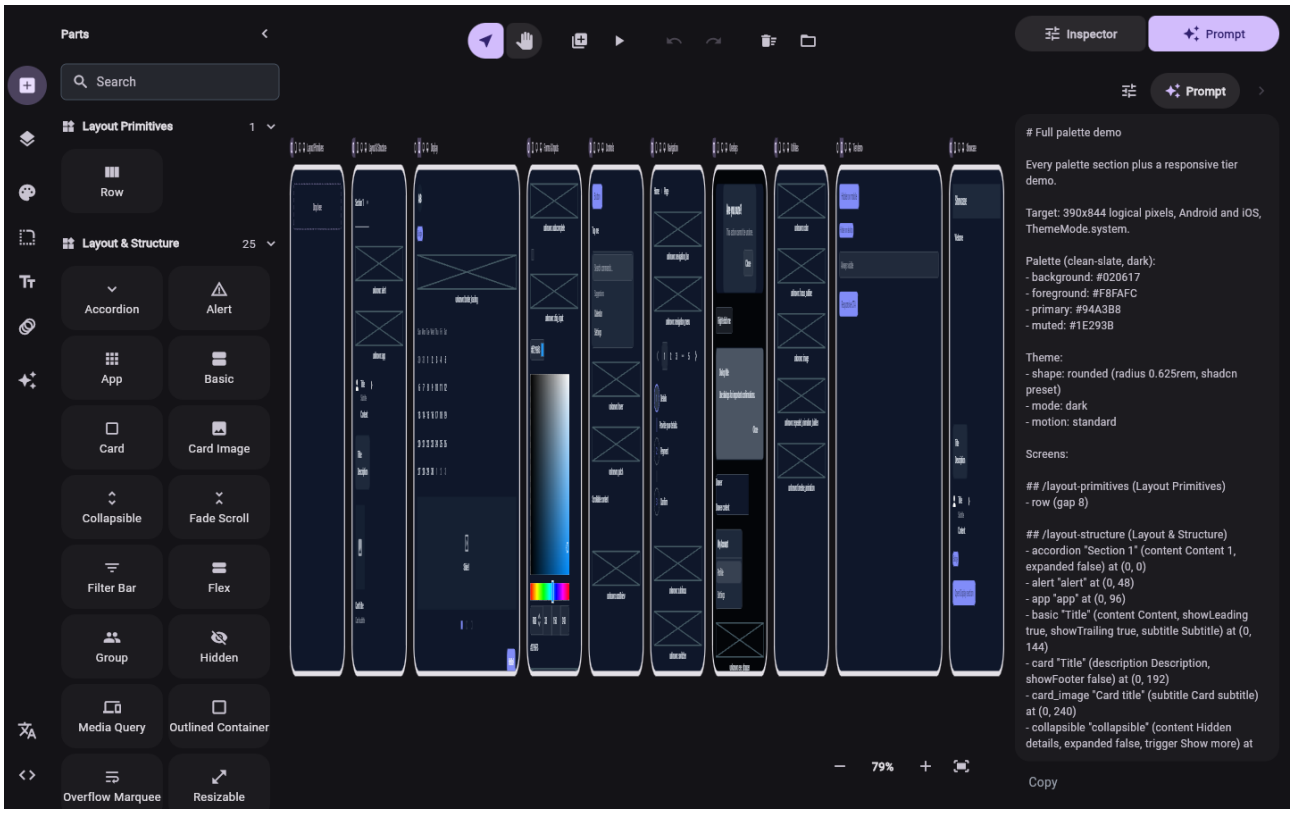

Branch feat/canvas-p3 · Flutter 3.47.2 · Release bundle, 1440×900 · Showcase seed: 10 screens, 137 nodes, 4 tap actions

Track	What landed	Tests
S — regen proof	Write-mode regen run on quiet tree: byte-identical output (same sha). No template change needed.	+0
T — narrow fixes	7 overflow fixes (divider/radio/pagination/menubar/tab×2/stepper); command stays static (documented).	+73
U — field audit	5 mutators dropped hiddenOn/values/slots (move/patchItem/clear/patchNode/duplicate) — all fixed, deep-copy pre	+14

flutter analyze: clean both packages. Suite: app 568 pass, core 68 pass, 0 fail. Zero console errors with 137 nodes. Palette shows new tiles (Media Query, Outlined Container, Overflow Marquee, Resizable).

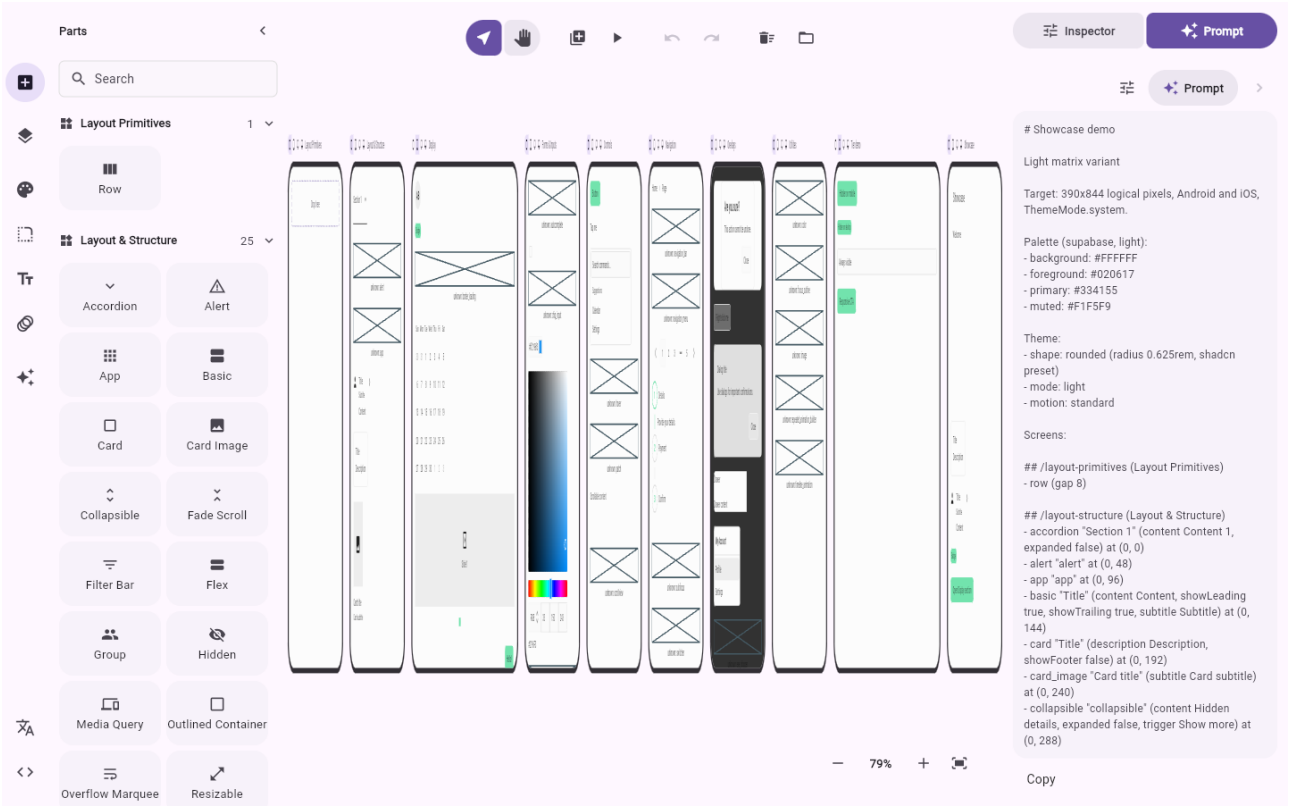

1 · Dark / clean-slate — Showcase seed, 10 screens

Showcase screen renders scaffold+card+basic+badge+button chain; Tier demo on tablet device; OTP/color/calendar/carousel/tree/table/form/color builders live. No red error screens.

2 · Light / supabase — Showcase seed

Prompt reports (supabase, light) with full node enumeration; new builders consistent in light; no stray colors.

Backlog for the next bit

E1 — Export compile-check: generate single+bundle code for the Showcase seed and run it through dart analyze — proves the export contract end to end.
E2 — Preview tap-chain e2e: drive PreviewPlayer Showcase→Display→Controls→back in widget tests (assignment + navigation exist; chain coverage missing).
E3 — Builder depth: multi-item nodes per builder; command-shell narrow note stands.
Loop rule stands: find → fix → analyze+test → re-seed + matrix → next.
